

This document explains how you can post messages, ask questions or comment on other posts that you see on the Preferred Stock Investing web log (“blog”) at:

<http://www.PreferredStockInvesting.Blogspot.com>.

Creating A New Post – Become An Active Participant

On the Preferred Stock Investing Reader’s Forum you can see the main posting area on the left that occupies most of the screen space. If you would like to post to this main posting area please send an email request to ActiveParticipant@PreferredStockInvesting.com. You will receive an auto-reply email message with instructions.

I invite you to become an Active Participant and create new posts to record your thoughts, experiences and questions regarding preferred stocks and investing in them. It’s easy and quick to do and the valuable interaction that you will receive in return will provide continuing benefits to you personally.

Commenting On A Post

Alternatively, if you would just like to comment on the posts that others have posted in the main posting area just click on the “**-Click To Post Comments**” link that you see at the bottom of each post. To prevent spammers from overwhelming our blog, the system will ask you to enter a password (or create a new one).

Reacting To A Post

The Preferred Stock Investing Reader’s Forum is viewable by the general public. You can record your reaction to a post by using the **Reactions** buttons that you see below each post. Just click on one of the checkboxes and your reaction will be tallied up.

In the world of blogs, what determines their ultimate longevity is your participation. While I will post preferred stock research articles here regularly, the ongoing preferred stock research that I perform on behalf of subscribers to the CDx3 Notification Service is my highest priority.

We have a long list of very exciting enhancements planned for the Preferred Stock Investing Reader’s Forum. With your participation, I look forward to bringing them to you.

Many Happy Returns,

Doug K. Le Du, author of *Preferred Stock Investing*
